

Dear Mr./Mrs. ,

We need the following documents for a definitive registration for the dialysis:

- A detailed medical report from your dialysis doctor (diagnoses, anamnesis, laboratory, instrumental diagnostics, current therapy).
- Hepatitis B and C serology, HIV test (if possible current findings).
- Up-to-date dialysis therapy plan and report if there are any problems.
- Confirmation from your dialysis doctor that you are suitable for limited care dialysis.
- Coverage of costs confirmed by your health insurance company (see attachment).
- Consent to the processing of personal and sensitive data in accordance with.

We need these documents in order to be able to provide you with the best possible support. We can only give you a definitive commitment for the planned dialysis once we have received and checked the above-mentioned documents.

Our dialysis center provides the heparin for dialysis.

Anyone that needs Fraxiparine, Fragmin, EPO or any other medication during dialysis treatment must bring it with them from their own dialysis center.

Best regards

Alex Losa
